

Discussion: DRUID 2022 Session - Markets for technology: Litigation

Roman Jurowetzki, Aalborg University Business School, DK

Continuation Patents and Litigation

Cesare Righi

Recap

- **The use of continuations leads to more litigation.**
- Yes!
- Submarine patenting 🦷 - that's not nice.
- Limiting may help reduction of litigation
- Yet: investment in innovation may be reduced

Feedback

- Excellent insight into the processes of litigation
- Well written
- Takes various perspectives (one by one)

More Feedback

- Data: Patstat Fall 2014 (is the age an issue?)
- Textual distance. How well does Keyword-Jaccard really capture scope in clames?
- Structure a bit confusing - several waves of analysis creates an impression of more than 1 paper in a paper
- More focus on potential consequences for investment in innovation

NPEs, Patent Quality and Litigation Strategies across European Jurisdictions

Valerio Sterzi, Cecilia Maronero, Andrea Vezzulli

Recap

- Propositions
 - Complexity of the context and relational value (positive link)

Feedback

- exciting case within a "mission-oriented" context

CEO Overconfidence and the Decision to take a Patent Litigation Case to Trial

Zhe Yang, Nikolaos Papagergiadis, Andreas Procopiou, Wolfgang Sofka

Recap

- different combinations of innovation dypes

Feedback

- interesting method
